

## **Instructions**

Make sure you drag the folder with the exe file and data folder together into your desktop otherwise would not work if they are separated, and here are two different versions of the game just in case what type of Windows bit is your PC.

1. Windows 32bit

If you're a mac user, you will see a app symbol in one of mac folders just copy and paste onto your desktop.

2. Mac 32 bit

The game controls is

W : up

A : left

D :right

Q: Quit Game

R: Reset

Left Mouse Click : Click on main menu buttons

However if you want to leave game then you will have to use task management because the game does not have a script to quit or finish the game story and click exit on the main menu.
